DIRECTIONS FOR USE

APPLICATION PROCESS

LIQUID RELEASE should be sprayed lightly on the under-side of the stamping tool. Before stamping, the concrete should be allowed to cure to a spongy but firm surface that is not hard. Once the concrete is stamped, remove the stamping tool immediately but carefully and allow the concrete surface to dry. Reapply Liquid Release as needed throughout stamping process.

FINISHING

Because liquid release leaves no color, use Increte System's Antiquing Agent to provide a secondary color to the stamped surface. Consult technical data sheets for application procedures and safety precautions.

PRECAUTIONS/LIMITATIONS

Do not take internally, or allow prolonged contact with the skin. If swallowed contact a physician immediately.

FOR PROFESSIONAL USE ONLY.
