

UNI-STRIPP

UNIVERSAL STRIPPER FOR ALL PAINTS AND COATINGS

DESCRIPTION

UNI-STRIPP universal stripper is an environmentally safe paint and coatings stripper designed to remove a wide variety of paints, stains, and varnishes which are oil or water-based including, latex alkyds, stains, enamels, lacquers and clear paints. Unlike other paint removers, UNI-STRIPP can remove more difficult coatings such as two component epoxy or urethane sealers from concrete surfaces. UNI-STRIPP is also very effective on mastic adhesives and glues.

UNI-STRIPP

UNIVERSAL STRIPPER FOR ALL PAINTS AND COATINGS

DIRECTIONS FOR USE

UNI-STRIPP is applied to the coating surface at approximately 1/32 inches. Application can be by brush, roller or trowel. For best results cover all applications with plastic. A small test patch of the coated surface should be applied first. This is to determine the dwell time needed to soften and remove the coating. Normally two-component epoxy systems need an extended dwell time. Thermoplastic acrylics often require less than 30-minute dwell times.

UNI-STRIPP may be worked in with a stiff bristled broom for added effectiveness. Loosened coatings can then be scraped or rinsed with a power washer. Control rinse water runoff. Re-apply stripper as needed.
